Data Analytics Project

Project Objective

Understanding customer behaviour and sales performance through an interactive Excel dashboard.

Vrinda Store wants to create an annual sales report for 2022 to understand customers, identify sales patterns, and support better sales decisions for 2023.

Key business questions

- How do monthly sales and orders compare?
- Which month recorded the highest sales and orders?
- Who purchased more in 2022 — men or women?
- What are the different order statuses?
- Which states and channels contribute most to sales?
- How do age group and gender relate to order volume?
- Which product category has the highest sales?

Interactive Excel Dashboard

A single-page view of orders, sales, customer segments, order status, states and sales channels.

Key Insights

Highlights visible from the 2022 dashboard.

Gender split

Women account for about 64% of orders, while men account for about 36%.

Top contributing states

Maharashtra, Karnataka and Uttar Pradesh are the leading states by sales.

Order status

The dashboard shows delivered orders as the dominant status (about 92%).

Sales channels

Amazon, Flipkart and Myntra are among the major contributing channels.

Conclusion & Project Skills

Turning raw sales data into a clear, decision-ready dashboard.

Business takeaway

- Focus customer analysis on the strongest gender and age segments.
- Use state-level sales patterns to understand regional demand.
- Prioritize high-performing online channels for promotions and offers.
- Monitor delivered, cancelled, returned and refunded orders separately.

Goal: use the 2022 analysis to support better sales planning for 2023.

Tools & techniques

- Microsoft Excel
- Pivot Tables
- Pivot Charts
- Slicers & Filters
- Data Cleaning
- Business Insights
- Dashboard Design
